Mayhew Tools— a tradition of craftsmanship.

Mayhew Steel Products is proud to present our new catalog of hand tools for the modern craftsman. These fine tools are made with the same respect for quality our founders established in the 19th century when blacksmiths fashioned steel into the first **Mayhew Tools.** The tools of our time have replaced ice picks and gimlets, but hand forging is still the heart of our production line. Today's Mayhew craftsmen are as dedicated to our reputation for quality and durability as were our predecessors of 1856.

Finishes

Mayhew Tools are hand hot-forged from high quality steel. Hardening and tempering is controlled to produce tools of maximum durability. Tools are individually ground and polished to a smooth metallic shine.

Tools are available in several finishes. Those manufactured from hexagon steel are usually painted black, with ends polished. The industrial economy tools are blast finished. Round tools have knurled bodies for a safe grip, polished ends and, as with all our unpainted tools, a rust-preventative coating.

Safety Information

Always wear safety goggles when working with hand tools. When striking a tool, use a hammer with a head slightly larger than the struck face of the tool. Avoid glancing hammer blows. Chisels and punches will perform effectively only when used on materials softer than the hardened cutting or point end of the tool. Follow sharpening suggestions below.

Resharpening

We recommend the use of a file or hone when resharpening **Mayhew Tools.** If a grinding machine is used, avoid over heating or burning, which can alter the tempered surface, making it brittle and prone to fracture. Resharpening should always return the cutting edge to its original angle.

About Our Displays

Maximum merchandising for limited space. Attractive blue wire racks are sturdy. Six holes for each tool, and tool numbers on display make restocking fast and easy.

About Our Kits

Carefully selected tool assortments assure fast turnover. Plastic kits are attractive and rugged, grommets for hanging on pegboard.

KITS — (See Page 12.)

NEW! Carded tool line — Please see Page 5.

#3 PUNCH & CHISEL, WIRE RACK DISPLAY UNITS

Mayhew introduces its new, colorful, eye-catching, wire rack display units, for use on counters or pegboards. These units are designed to hold six fast-selling kits and thirty individual tools. Mayhew recommends that for the most effective use of store space that the complete #3 display unit be purchased. Units may also be purchased separately. Tool type identification and uses on Wall Unit 3B.

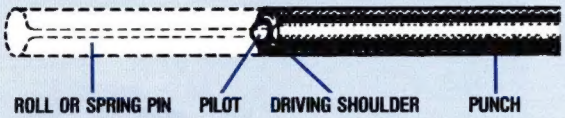
Pilot Punches® (Roll Pin Extractors)

MAYHEW
Shelburne Falls, MA U.S.A.



The Mayhew Pilot Punch is designed to apply equal pressure to the end of the pin thus driving it straight through the hole. The round ball on the center of the point end assures proper contact with the pin thereby eliminating any damage to the pin or hole wall. (Manufactured to +.000, −.010 tolerance)
PATENT NO. 3,099,876

Industrial Economy Tool Line (Blast Finish)

MAYHEW
Shelburne Falls, MA U.S.A.

MUST ORDER BY EDP NUMBER FOR ECONOMY FINISH.

Mayhew's has built a reputation in the tool field for dependable, attractive tools. All our tools are made from high quality steel, are hardened, tempered, and ground to meet our high standards, and carry our guarantee.

To make your quotations more attractive in the industrial and government markets we now have tools available with blast finish. Only the surface is changed; there is no change in quality.
